

# **Archer Ave and Harlem Ave**

**<East and Southbound>**

## **RLR Crash Data and Analysis**

The table and chart below show a summary of motor vehicle crashes at the intersection of Archer Ave and Harlem Ave over a span of 4 years. The data from 2010 to 2012 show the period prior to the installation of RLR cameras. The data from 2013 show the year in which the cameras were installed. The data from 2014 show the year following the installation.

	Turning	Rear End	Angle	Cyclist/Ped.	Other	Total
<b>2010</b>	11	16	4	0	0	<b>31</b>
<b>2011</b>	8	9	2	3	1	<b>23</b>
<b>2012</b>	8	15	1	0	2	<b>26</b>
<b>2013</b>	9	13	2	0	3	<b>27</b>
<b>2014</b>	14	9	0	0	1	<b>24</b>

In 2012 the Average Daily Traffic (ADT) volume along Archer Ave reached 29,000 to 33,800 cars at the intersection of Archer Ave and Harlem Ave. The ADT along Harlem Ave reached 43,800 to 45,500 cars, according to IDOT.

In 2014 there was a negligible change in ADT at this intersection.

At the intersection of Archer Ave and Harlem Ave there were 31 accidents in 2010, 23 in 2011, 26 in 2012, 27 in 2013 and 24 in 2014.

## Collision Diagram

1/1/2013 to 12/31/2013

Crash Route: IL043 | From MileStation 19.92 to 19.92 | County : Cook | Intersection Related: Intersections | \*See Notes at End of Report.

### Notes

Current year and previous year data are not yet complete and are subject to change as more information becomes available. Calendar date selections include data based on the date of the crash. Year selections include data based on the statistical year in which the crash was processed.

The intersection-related field could be incorrect and affect the data on the report.

If a crash occurs between two municipalities, it may be coded to another city/county from what is on the crash report.

Crashes with incomplete location information are not included.

Areas where routes have more than one junction have been known to cause problems in determining accurate locations. Please notify us to verify the data for intersections with more than one junction.

For roadway segments which include the intersection of two routes, the intersection report may need to be run on the other route in order to get all the crashes.

## Collision Diagram

1/1/2012 to 12/31/2012

Crash Route: IL043 | From MileStation 19.92 to 19.92 | County : Cook | Intersection Related: Intersections | \*See Notes at End of Report.

### Notes

Current year and previous year data are not yet complete and are subject to change as more information becomes available. Calendar date selections include data based on the date of the crash. Year selections include data based on the statistical year in which the crash was processed.

The intersection-related field could be incorrect and affect the data on the report.

If a crash occurs between two municipalities, it may be coded to another city/county from what is on the crash report.

Crashes with incomplete location information are not included.

Areas where routes have more than one junction have been known to cause problems in determining accurate locations. Please notify us to verify the data for intersections with more than one junction.

For roadway segments which include the intersection of two routes, the intersection report may need to be run on the other route in order to get all the crashes.

### Notes

Current year and previous year data are not yet complete and are subject to change as more information becomes available. Calendar date selections include data based on the date of the crash. Year selections include data based on the statistical year in which the crash was processed.

The intersection-related field could be incorrect and affect the data on the report.

If a crash occurs between two municipalities, it may be coded to another city/county from what is on the crash report.

Crashes with incomplete location information are not included.

Areas where routes have more than one junction have been known to cause problems in determining accurate locations. Please notify us to verify the data for intersections with more than one junction.

For roadway segments which include the intersection of two routes, the intersection report may need to be run on the other route in order to get all the crashes.

# Traffic Volume

# July 2012

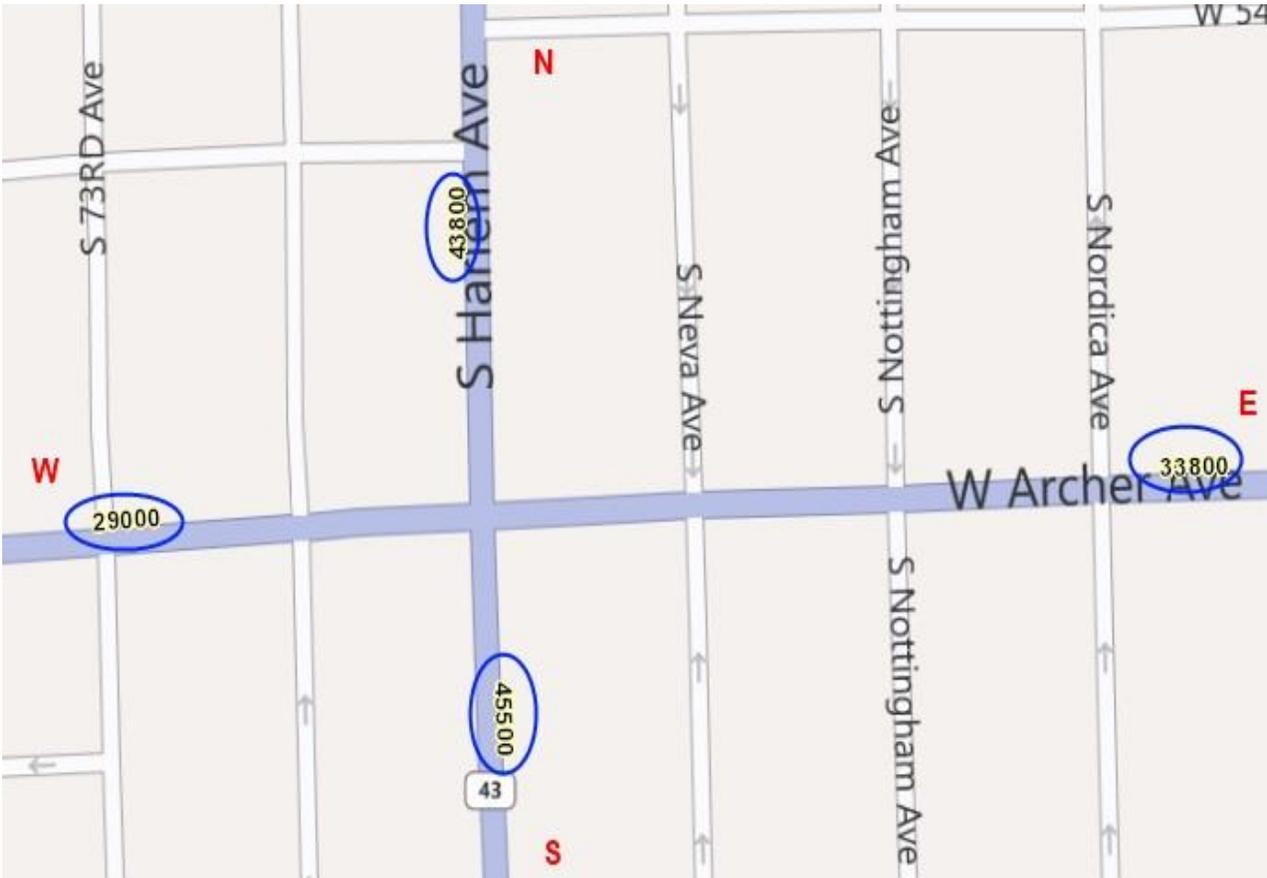

The traffic numbers below were obtained from the IDOT website per the RLR Guideline document published by IDOT. Only ADT values were available, peak numbers were not provided.

## Harlem Ave ADT

- North: 43,800
- South: 45,500

## Archer Ave ADT

- East: 33,800
- West: 29,000

# July 2014

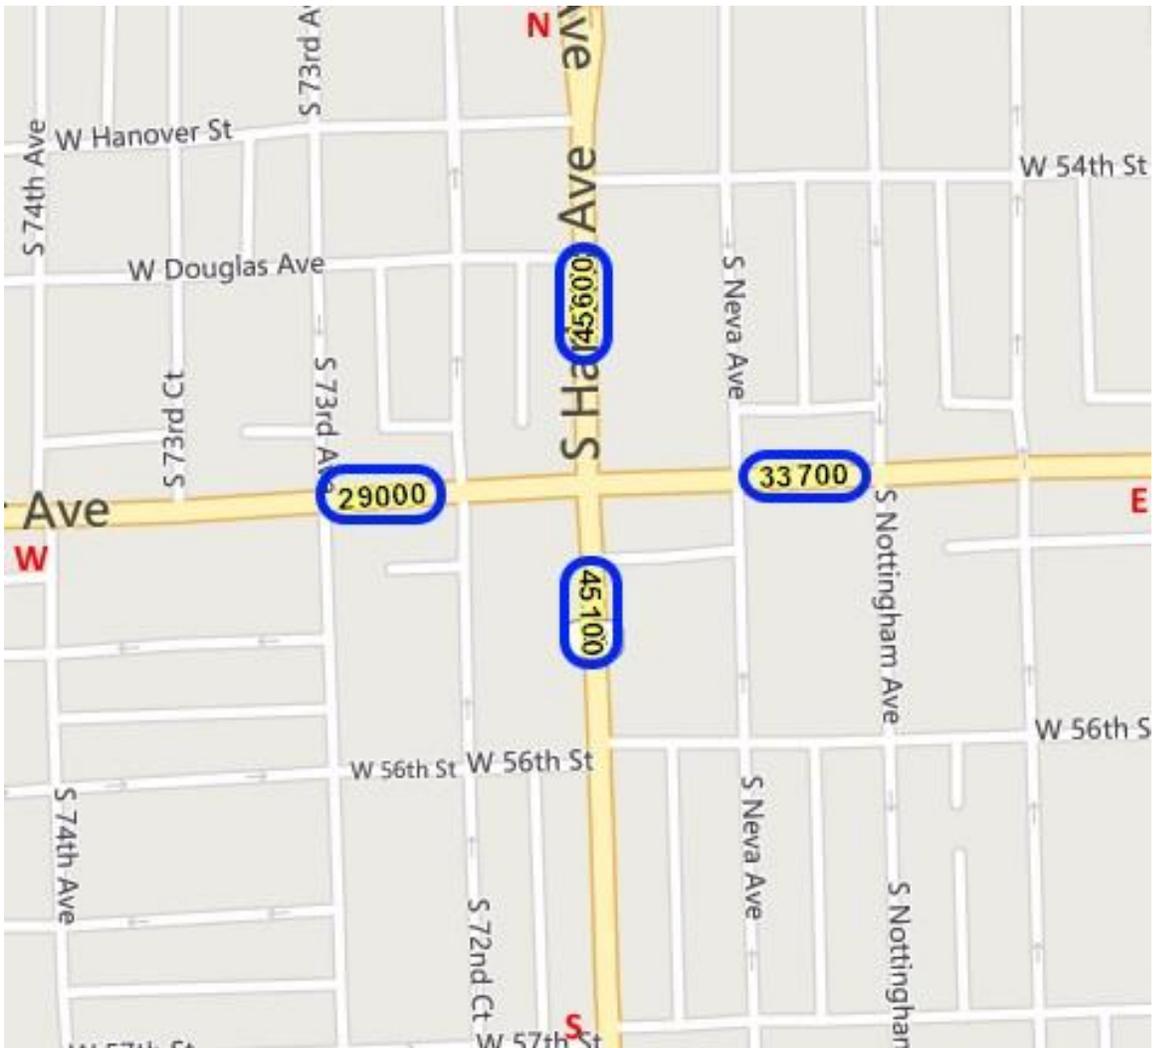

The traffic numbers below were obtained from the IDOT website per the RLR Guideline document published by IDOT. Only ADT values were available, peak numbers were not provided.

## Harlem Ave ADT

- North: 45,600
- South: 45,100

## Archer Ave ADT

- East: 33,700
- West: 29,000

# Summary

All processes are in compliance with the RLR regulations laid out by the Illinois Department of Transportation District 1 Bureau of Traffic Operations.

After analyzing all of the available data, we believe that the RLR cameras located at the eastbound and southbound approaches of Archer Ave and Harlem Ave are contributing to improved traffic safety in the **Village of Summit**. Although the installation was approved at the close of 2012, the cameras did not go live until nearly halfway through 2013, and thus did not begin issuing tickets until this time. Bearing this in mind, it is unsurprising to learn that the type and frequency of crashes at this intersection in 2012 were not significantly altered in 2013 either positively or negatively. Nevertheless, the crash data from 2014 show zero **Angle** crashes, a trend we hope will continue. This intersection will be reevaluated in three years' time, per IDOT guidelines.

Crashes that are most likely to result in bodily injury are those in which one vehicle strikes one or more vehicles in motion at a 90 degree angle. A crash of this kind is commonly referred to as a "T-Bone" crash, or an **Angle** crash. The damage sustained by vehicles involved in these types of crashes is typically more severe than that sustained from **Rear End** crashes. Studies have shown that installing RLR cameras at problem intersections helps to lessen the chances of one of these crashes occurring.
